

Environmental Management's Quarterly Project Reviews

QPR Timeline - Each project in the QPR “queue” is placed on a 90-day recurring cycle to be reviewed by EM-1 or delegated designee (each project is given 30 minutes review time).

Future QPR Process - The QPR process is continually evolving to adapt to new/ additional requirements. In the near future, we expect a significant increase in the number of EM projects that will be subject to the Order and the majority of the QPRs will be conducted at the Sites. Specific guidance on how these Site QPRs will be coordinated with the Programs and EM-6 is currently being developed. As with most EM-6 guidance, it will be worked through the Implementation Team and the Steering Committee and distributed to the Site teams and the Field for review and comment.
