

ACE Team History

- At the same time, the ACE Team conducted a survey to determine what cost estimating software were used by various DOE EM sites.
- Based upon the survey results, a decision was made to support RACER, which was determined to be most commonly used cost estimating software
- The ACE Team started within the ER Program. However, with the reorganization of EM in 1999, the ACE Team was expanded to include WM, Technology Development, and other programs.
