

## PREFACE

The information in this report summarizes the U.S. Department of Energy (DOE) data base for inventories, projections, and characteristics of domestic spent nuclear fuel and radioactive waste. This report is updated annually to keep abreast of continual waste inventory and projection changes in both the government and commercial sectors. Baseline information is provided for DOE program planning purposes and to support DOE program decisions. Although the primary purpose of this document is to provide background information for program planning within the DOE community, it has also been found useful by state and local governments, the academic community, and some private citizens. To sustain the objectives of this program in providing accurate and complete data in this field of operation, comments and suggestions to improve the quality and coverage are encouraged. Such comments and any general inquiries should be directed to DOE's Office of Environmental Management at either of the following:

Office of Waste Management  
Route Symbol EM-35  
Trevion II Building  
19901 Germantown Road  
Germantown, MD 20874-1290

Office of Environmental Restoration  
Route Symbol EM-43  
Cloverleaf Building  
20400 Century Boulevard  
Germantown, MD 20874

This report was prepared by the Integrated Data Base Program, which is sponsored by the DOE Office of Environmental Management. Suggestions, questions, and requests for information may be directed to any of the following:

M. J. Zenkovich, DOE/EM-35, Germantown, MD 20874-1290  
Telephone: (301) 903-7126  
E-mail: Mathew.Zenkovich@em.doe.gov

M. D. Tolbert-Smith, DOE/EM-43, Germantown, MD 20874  
Telephone: (301) 903-8121  
E-mail: Marilyn.Tolbert-Smith@em.doe.gov

S. N. Storch, ORNL, P.O. Box 2008, Oak Ridge, TN 37831-6111  
Telephone: (423) 576-7575  
E-mail: sns@ornl.gov

An important part of the Integrated Data Base Program is the Steering Committee, whose members provide both generic guidance and technical input. The membership of this committee, shown on the following page, represents all of the major DOE sites and programs for spent nuclear fuel and radioactive waste management. Each support committee member is assisted by a technical liaison as needed. The participation and assistance of these individuals are acknowledged with appreciation.
